Observations courtesy of [NOAA National Ocean Service](https://www.noaa.gov/) .

**NOTE:** During a Tropical Storm or Hurricane Watch or Warning, inundation mapping provided by the [National Hurricane Center](https://www.nhc.noaa.gov/) (go to the web site and select the storm of interest) reflects a reasonable worst case scenario. The forecast above is the total water forecast that is most likely to occur.

Forecasts for the Cooper River at Charleston Harbor (IN MLLW) are issued routinely year-round.
