Observations courtesy of [US Geological Survey](http://www.usgs.gov) .

NOTE: Due to the removal of a nearby low-head dam, the USGS relocated this gauge from just upstream of the U.S. Highway 231 bridge to the bridge at Lafayette Avenue which resulted in changes to the gauge heights and datum. See the Additional Information section further down on this page for more details. Forecasts for the Sugar Creek (IN) at Crawfordsville are issued as needed during times of high water, but are not routinely available.
