Observations courtesy of [US Geological Survey](https://www.usgs.gov/) .

**NOTE:** The reference level, or vertical datum, for this gage has been updated to NAVD88. That means the stage heights will now be reported from that reference level which will give the water level as height above mean sea level. All flood stages have been changed accordingly.

Forecasts are not available for the Elk Creek (WA) near Doty. Only observed stages are available for this point.
